From engine block to tailpipe, see every detail

## NEW FLEX SERIES: THE FLEXIBLE, MODULAR UNDER VEHICLE SURVEILLANCE SYSTEM

Real-time inspection of the undersides of vehicles has never been this easy

and affordable. Modular construction makes it easy to configure a system exactly suited to your needs—and reconfigure if your needs change. The Flex series integrates a rugged high-resolution color video camera and high-brightness, long-life LED lighting in a single module to give

you crisp, clear viewing. The Flex series UVSS sets a new standard in scanning, monitoring, and digitally recording the entire width of a vehicle's undersides to detect attached packages, contraband, explosives, and other objects.
